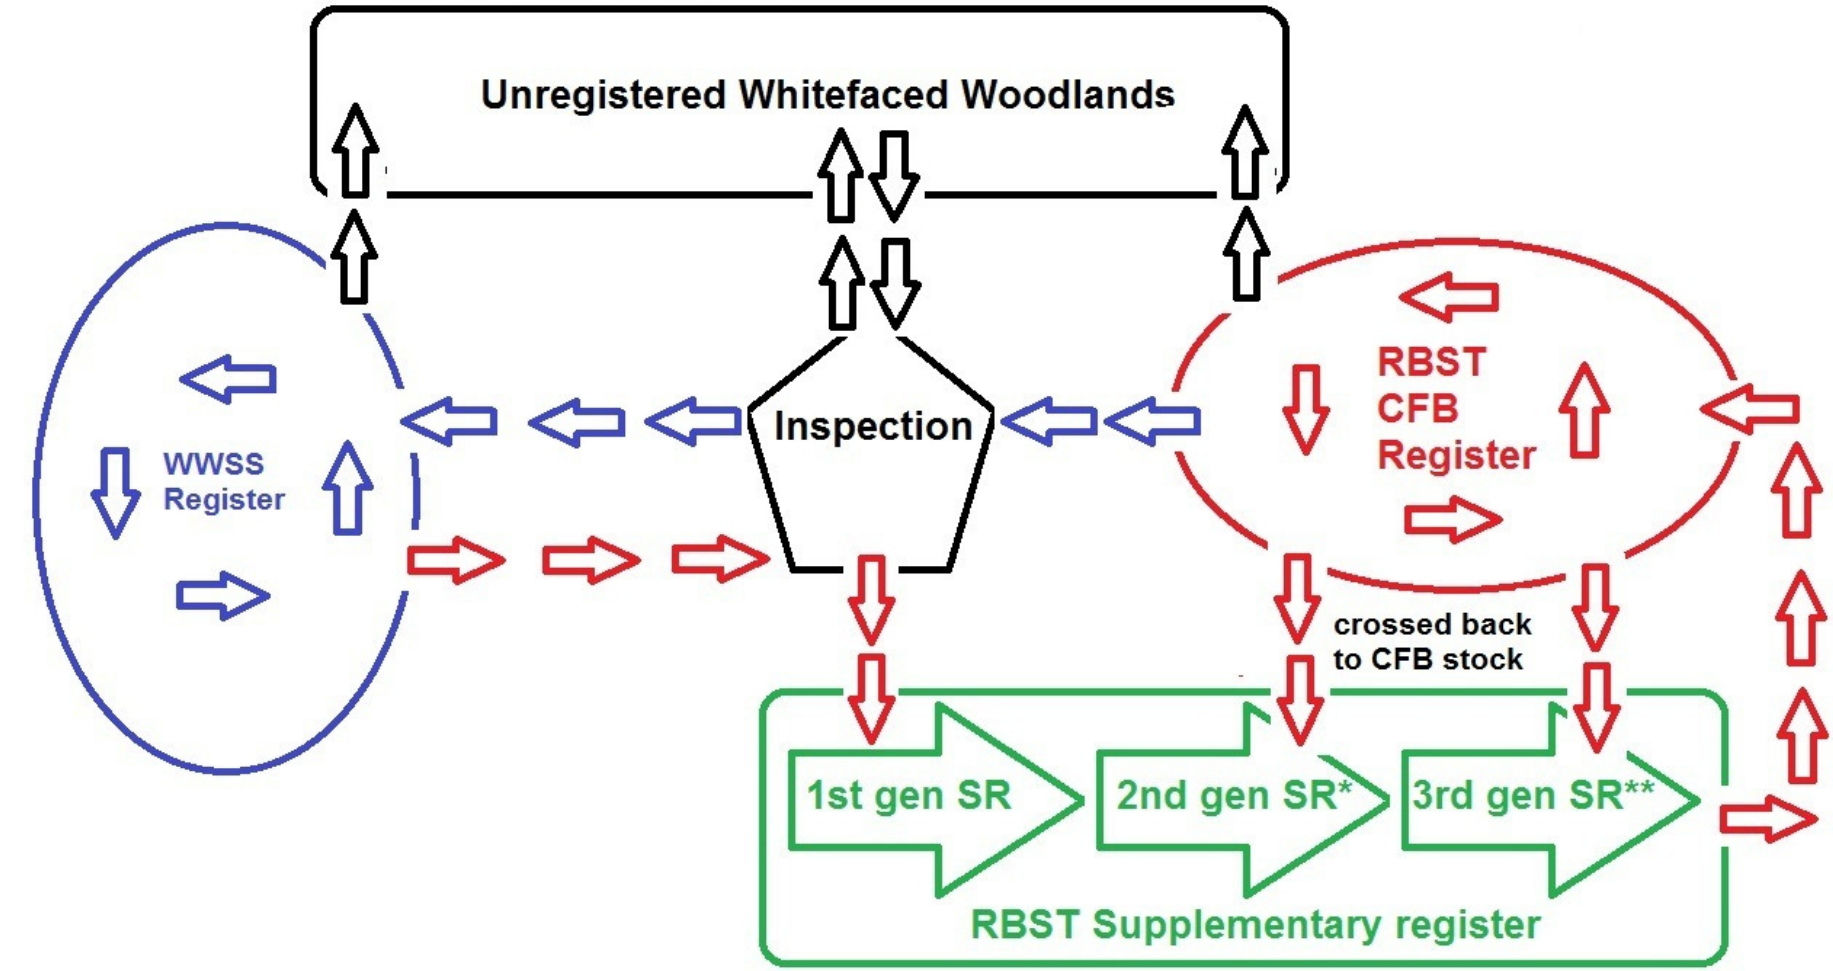
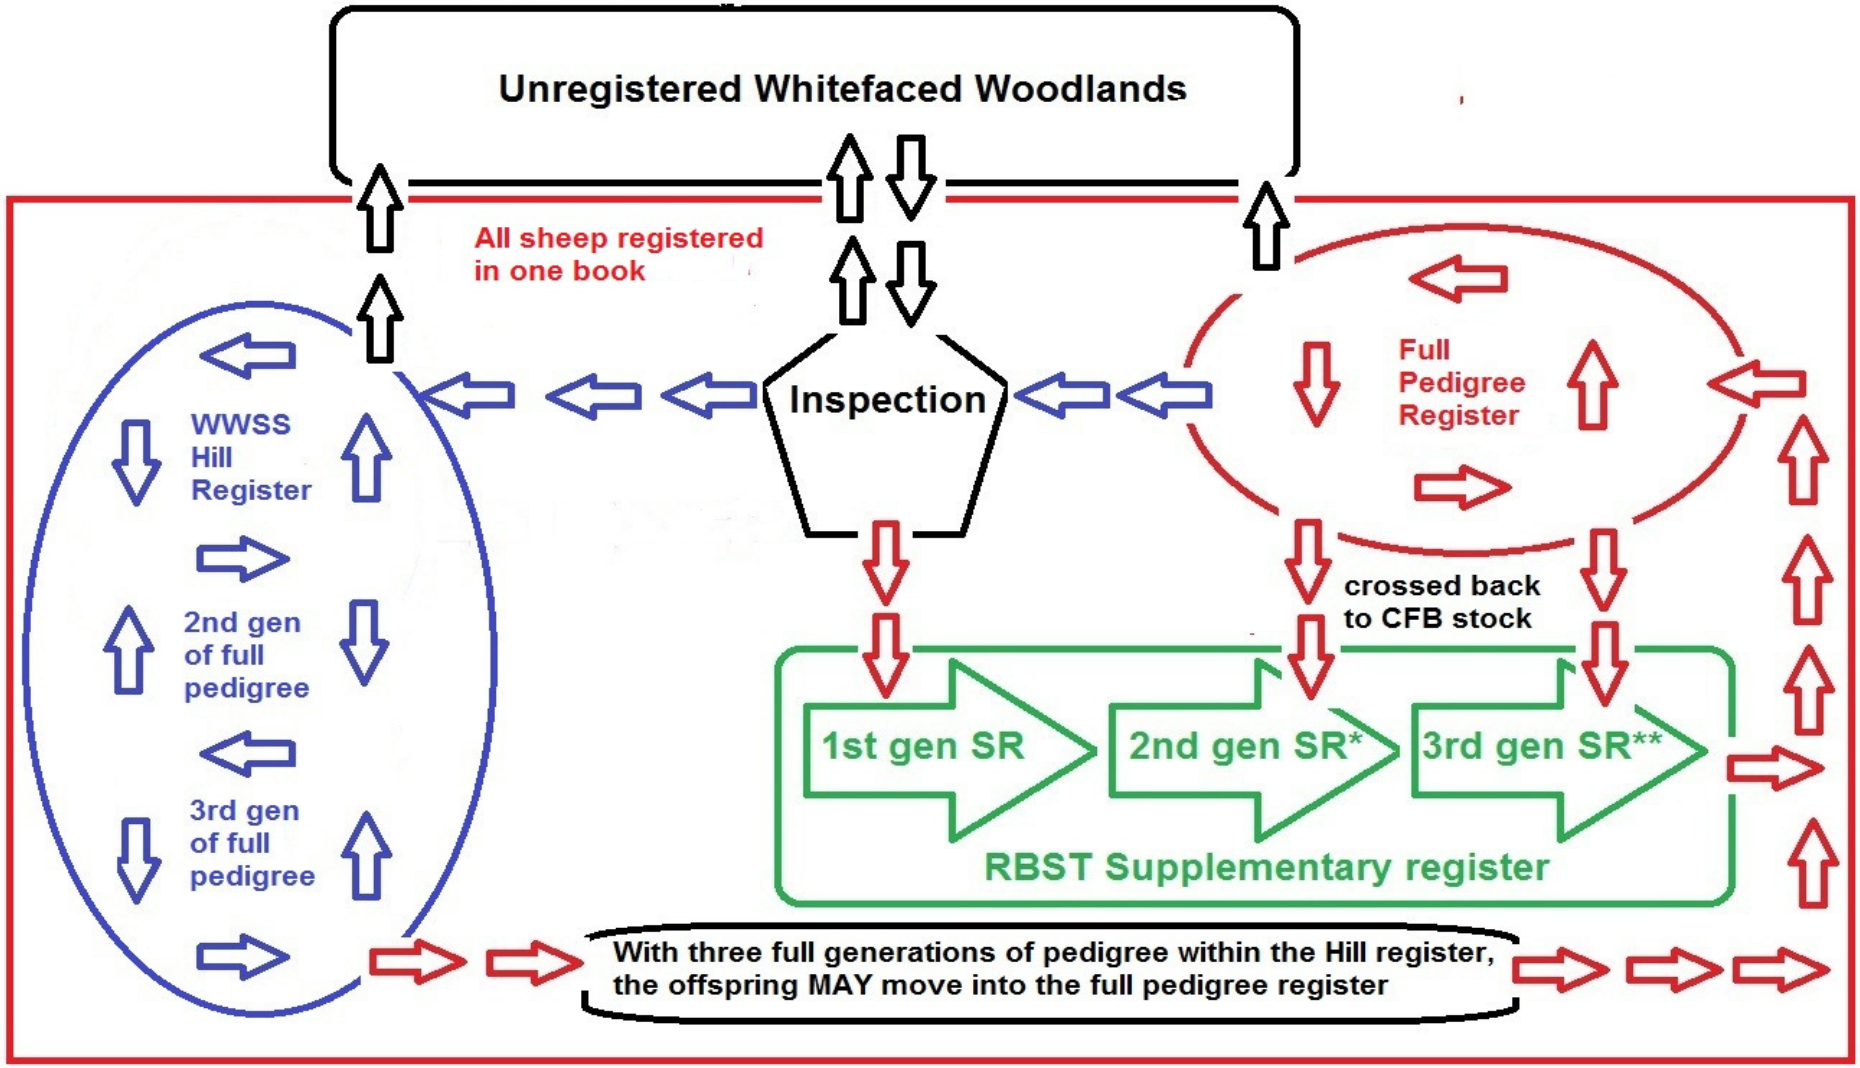
The registration process today



The proposed registration process



Which sheep are eligible for each register?

A fully registered sheep coming from the RBST CFB register is denoted by the letter R for registered.

An inspected sheep of known provenance entering the Supplementary Register is denoted by the letters S for Supplementary registered sheep.

An inspected sheep of known provenance entering the Hill register is denoted by the letter H

A number following either the letter S or H denotes how many generations of full pedigree that animal has. So a sheep denoted S 3 has three full generations of pedigree or more and is then eligible to enter the Pedigree register.

Supplementary Register

S = Inspected sheep of known provenance
S x R = S2
S2 x R = S3
S3 x R = R

Sheep crossed to Supplementary registered sheep take the S level of lowest parent, they must be crossed with R sheep to move up:

S x S = S
S1 x S = S
S2 x S = S
S2 x S2 = S2
S3 x S = S
S3 x S2 = S2
S3 x S3 = S3

Hill Register

H = Inspected sheep of known provenance
H x H = H1
H1 x H1 = H2
H2 x H2 = H3 = R

Sheep crossed within Hill register move up one level on lowest parent:

H1 x H = H1
H1 x H1 = H2
H2 x H = H1
H2 x H2 = H3
H3 x H = H1
H2 x H1 = H2
H3 x H2 = H3 = R
H3 x H3 = H3 = R

Pedigree Register

Eligible sheep

R x R = R
S3 x R = R
H3 = R
H2 x H2 = H3 = R
